

# Safe & Effective Head Lice Treatment

Head Lice is another problem we can handle differently, no need to expose our children to caustic pesticides. Don't be embarrassed if it happens to your child, 'Lice Happen' even in the best of homes. It happened to my daughter after a slumber party.

## Treatment for head lice:

1. Shampoo hair thoroughly with **Shaklee's ProSante' Revitalizing Shampoo** then
2. Put an LARGE amount of **Shaklee's ProSante' Replenishing Hair Conditioner** on hair, making sure all hair is coated. -VERY IMPORTANT!
3. Wrap hair with plastic wrap or a large plastic bag and keep conditioner on for one hour. **DO NOT RINSE...**
4. Comb through with a regular comb (to remove tangles)
5. Then a lice comb while conditioner is still on hair. This removes the dead lice and eggs and helps the comb move easily through the hair because of the conditioner. After this is done...
6. Rinse.
7. REPEAT THIS WHOLE PROCESS AGAIN after you've rinsed for the second process you should not see any lice. **NOTE:** Make sure you get all the nits/eggs when combing.

**IMPORTANT: YOU MUST REPEAT** this same process again 7-9 days later.... after that the problem should be gone.

**Also make sure you wash all bedding in HOT water** otherwise you may re-infest.

**Why this process works?** Since lice do not like *Tea Tree Oil* that's in the ProSante' shampoo and conditioner, they hold their breath for 20-30 minutes. The conditioner keeps them from breathing until they die. Then all you need to worry about are the leftover eggs hatching....hence you **HAVE TO REPEAT** the process again when they hatch and are too young to lay eggs, 7-9 days later.

**I KNOW FROM EXPIERANCE THAT THIS REALLY WORKS** and is a blessing for girls with long hair! Not to mention NOT putting a caustic pesticide on your child's head (which can enter their blood stream near their brain) that is the equivalent of RAID!
